HOW TO CLEAN AIR CONDITIONERS

1

To clean the air conditioner or cooling fins, make sure the power from your unit is disconnected!

Save

Remove filter and wash away dust.

3

Spray 3-IN-ONE® Professional Air Conditioner Cleaner onto cooling fins vertically from left to right.

4

Cleaning agent will penetrate deep into the cooling fins. After two minutes, put filter back into the original place.

5

Switch on the air conditioner for at least 15 minutes to allow dirt to be drained out through the drain hose.

FRIENDLY REMINDER

For maximum performance, clean your air-conditioner every 3 months.
